

The Wisconsin Do Not Call list works, leave it alone. Wisconsin residents requested this service and the Wisconsin legislature in cooperation with the Governor made it a priority.

This has been the best use of my tax dollars. No more unwanted telephone calls. I should not have to purchase caller ID so that I can screen unwanted sales calls.

If I need information from a bank, I can pick up the phone and call them during normal business working hours. I do not want unsolicited business calls during the evening when I am at home enjoying my time with family and friends.

Leave alone something that works well for the residents of Wisconsin.
